

Field Trip Template

GeoscienceInfo virtual field trips are designed as a guide for field trips all across the province of Ontario. They are meant to provide the information necessary to visit each site, and as a teaching aid in the classroom, for teachers and students who are unable to visit in person. At each site, photos of the site, outcrops, and when available, hand samples and thin sections are provided, along with information describing the rock type present and its depositional environment. **GeoscienceInfo** brings Ontario's rich geology landscape to your fingertips!

We warmly welcome your input and contributions to the ever-growing list of field trips across Ontario. If you would like to share a trip with us, please follow the instructions below. Full credit will be given for each field trip posted on the **GeoscienceInfo** site.

Steps to submitting a field trip

Your Name:

Your Email:

Occupation:

Professional Designation (if applicable):

Field Trip Name:

Field Trip Duration (hours):

Overall Difficulty Level of Field Trip:

(1-5: 1=An easy stroll, 5=A high level of fitness required)

Overall Accessibility Level of Field Trip:

(1=All/most site accessible, 2=Some sites accessible, 3=Many sites inaccessible)

Contributors to this Field Trip (please list all other people who contributed to the production of this field trip):
